91 responses

Academic Experience

1. Courses in the syllabus provided:

[Copy](#)

91 responses

2. Students may find it more useful if the syllabus included ... (Please provide details):

91 responses

Field trips

NA

Yes

Practical examples

No suggestion

Inline with the CSIR NET and other academic competitive entrances

The syllabus was quite interesting and wholesome and we were allowed to choose the optional papers according to our interests.

More focus on language understanding and speaking before literature studies

More practicals and more field trips .
And training module for better job placement in future.

Should provide internships in good institutions and practicals can be better.

Please include graphic novel, japanese additional class

Aquaculture techniques and Taxonomy, Physiology and Biology of Marine & Inland Fisheries

Currently relevant topics

All the required materials.

PRACTICAL ASPECTS OF THE LANGUAGE. CURRENT SYLLABUS DOES NOT ENTAIL THIS.

More of practical work

Faculty provided more hands on support and knowledge during lab practicals.

More practical knowledge and materials should be updated

More Practical work, field visits and field work exposure

Zoology

Marine Biotechnology, Microbiology, Aquaculture, RDT, Biophysics, Immunology, Biochemistry, Scuba diving almost all area were covered

Practical experiences

More conversations and practical exercise

There were no Field visits/excursions during this course. So maybe, it needs to be looked at.

Could have been much better if some sort of interactive sessions or seminar, classess happened where we could have practice/ use more Portuguese language.

Instead of Literature , Language Courses till C3.

More practical work including theory

Revised syllabus

Very useful syllabus

Detailed learning objective and additional resources for further reading and practice

Books and other materials

more field visits

Practical guidance and how the pharmaceutical industry are actually

More Indian Based Authors

Comprehensive teaching dedicated for entrance exams

Subject like Mathematical biology, academic writing also included which will help student in improving the project work.

The syllabus should include weekly revision of the topic taught and more class discussions like making a presentation, in the form of creative art or holding a quiz of competitive exam questions related to that topic.

Visual explanation

more practical research knowledge

No

more of practical experience and infield demonstration on how the things actually work in the reality. As of my experience in field till now I've realised that things in the real world actually differ that in the books.

Exchange programs

Communication classes

More Field based work and relating the content to the day to day life

Practical

More practical work which will help in more understanding.

More practical knowledge . Instead of preaching about reducing carbon footprints , actual steps needs to be implemented.

Even more lab-work can be useful for students aspiring to get a Ph.D. More exposure during internships is required. Atleast 1.5-2 months should be provided for an internship if a student is to learn new techniques and get an idea on how a lab actually works.

Student Exchange Programs during learning session, interaction with portuguese speaking community, etc

Interview/job preparation

More topics that Included speaking and sharing Ideas / explaining power point presentations and analysing topics.

N/A

Less of basics and more of applied.

I think the syllabus is up to the point but the practicals can be better

If students were taught to get over their fear of interviews.

There should be more events and talks in department.

On field work

Practical experience

Advanced marine microbiology technology

The Syllabus should have had more of Applied Sciences, this would have made the subject more relative

Skill development

Hands on skills

More information about the Portuguese legal terminology and paleography

field / outdoor activity

If the teachers would have taught us in a better way.

By making it more intresting and understanding by using latest technology and practical studies.

Seminars and field trips.

Philosophy of Art

More practical related papers to be included.

More of hands-on experience, more of practical experience

More field work and exposure to advance techniques

Upcoming topics

More activities

Courses more relevant to present day

Some actual knowledge and less arrogant teachers like Chandrashekhar rivonkar

Conversational classes and translation classes. It's a foreign language. I don't want to spend two years learning history of Portugal and their language.

Practical knowledge of marine environment

Genetic engineering

Instrument learning session can be included for freshers

More of application oriented

More diverse stuff.

Research methods and data analysis

Practical work, experience professors

Well if we compare the situation of Portuguese language with other West European languages such as French, Spanish or German the number of PhD scholars in Portuguese language in India is significantly lower. Consequently, there are limited colleges or universities offering Portuguese language courses.

So i think to address this disparity and help the growth of Portuguese language studies in India we should have a greater emphasis on encouraging and supporting PhD research.

So, having a research oriented approach within the curriculum could be very helpful to contributing to the academic discourse in this field.

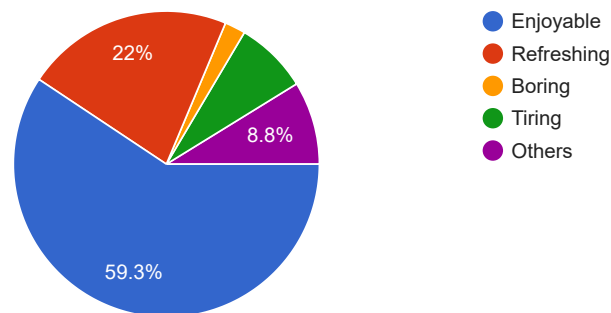

More field work like cruise trips

In depth knowledge of the subject, advanced syllabus and more hands on techniques

3. During the course my experience was:

4. Reason for being an alumnus

 Copy

91 responses

5. Expectations as an alumnus from the University

91 responses

-

.

NA

Nil

Nothing

None

Network

No expectations

Alumni meet should be held once a year as it gives as opportunity not only to meet our batchmates but also our teachers

I expect to have access to a strong network of fellow alumni for professional growth, career opportunities, and mentorship. I would like regular updates on university news, research developments, and alumni achievements through newsletters or alumni magazines.

Invitation for university events

Administration for international student (issuance of degree certificate & transcript int'l postage) more efficient and easier than before. It's difficult to ask department to email scanned copy of transcript & diploma.

Students should be offered more job oriented courses

Stay connected with old memories.

TO BE A PART OF ACTIVITIES CONDUCTED TO PROMOTE THE LANGUAGE

No

Knowledge on what they did (studied or took courses) further to achieve the current position.

If any meetings are there. Keep on Saturdays

Organize more networking events where in different batch alumni can interact in order to benefit from each others' experiences.

Develop mentoring relationship

More interdisciplinary research and collaboration with others

Arrange reunion

None as of now.

To get updated for any changes or by providing or getting opportunities

Provide more Leads to the Students after Graduation or Create International Student EX-change programs Courses.

Encourage job opportunities, provide specialization in subjects such as astronomy, quantum mechanics. if possible increase the seats for Msc degree to encourage students to take physics.

Get more updates

-

Career guidance, Financial Support and Personal and Professional development

to connect with individuals

Non

Newness

Respect, support and encouragement

Being an member in group it's proud all the latest information is provided by the teacher.

Job opportunities

I hope GU can introduce much more vigorous research or skills-based syllabus.

Publishing monthly newsletter about the things happening in University environment.

To keep updated with the latest job opportunities.

Improving course infrastructure and opportunity

Good placement drives for the New and Old Graduates.

Please put more time and effort before floating a new course. It isn't fun playing with a students life. Professor Rivonkar should learn to practise what he preaches before he preaches It again to other students.

To be in tiuch with the current students in order to guide and motivate them.

Need of radical innovation which will give students a learning experience and transportable knowledge and skills.

No expectations, all good

Guidance

Creating bridge between present and ex student for better network and opportunities

Academic and research Collaborations

-

Nothing

To provide better direction and guidance to new students.

Network with batchmates

Great opportunities

The University should come up with Programmes and Opportunities where the Alumni get chance to participate

To get intimations about Jobs related to professorship, assistant professorship in the field of English literature and other subjects.

A supportive community

Providing career guidance to alumni

Making us aware of the changes and working in university

NE

Career Opportunities, job placements for students.

Quality education and a supportive community, and high skilled experience.

Assistant in Career Enhancement

Have more skill courses on the study content rather than sticking to the syllabus

Organize campus placements.

Goa University should provide more exposure to students regarding the practical world rather than focusing more on theoretical knowledge. The students should be encouraged to take up projects or participate in projects in other institutions along with their academic work.

May there be NET exam in Portuguese too.

To keep updated with recent job opportunities

Get employment based on learnt course

Will be invited to the events going on in the university

Some Goan teachers that Deserve to be there

There is only one University in Goa and still you people are inefficient. Create more jobs, if you know people who can give jobs, share it with the students who are about to pass out.

Na

All is good

More instrumentation facilities can be installed

n/a

Up to date information on the university progress

I just hope University providesupport for alumni's professional development.

Providing guidance to graduate students

preferably on line meet ups through google meets if we cannot meet in person
