28. How can our programs be improved? What specific comments do you have regarding the curriculum?

9 responses

To fit our industry requirement, we recommend that the candidates willing to take up teaching as a profession, specially competitive exams, they should be trained on making more interactions with their students, be focussed on acheiving excellence in academics, building self capacity for better delivery in teaching, updating themselves with current trends and to have a long term focus. Thank you

-

field exposure/ common ethics and values to teach to be a responsible person/ skill based syllabus to teach and hands on practical knowledge

Maybe some more interactions with ex students in the Industry. Some examples of what;s expected in real-life industry working. Some tips and tricks on how to handle new stuff and also some ficus on attention to detail. Not just completion. Our team seniors here had that one main complaint. They finish, Yes. But don;t check it properly. To the highest standards and then Oops... Havta rework it, sorry we didn't think of that, sorry we missed that or even worse... Oh wow that was expected? We didn't know.... Of course it is, was and will always be!!! That's not good and troubling. Attention to detail is main in this industry and expected of IT professionals as they are and would be. Else yes, they're good kinds and no major issues....

Students need to realize internship is not only for certificate

Students should be encouraged to enhance their knowledge on current affairs in financial domain & not limited to academic studies only. Some of the question asked regarding discipline, ethics etc are individual personality dependent, though answered by us. Students should also be provided with industry specific requirement from job requirements so that they are ready for the role, this may also involve pursuing higher skills such as CFA, CFP etc. which will give them wider exposure within India & abroad.

none

We can impart skill-based training, mandatory internships for industry experience along with awareness and preparation on many other competitive exams so that students are job-ready along with studies

Promote more social activities to improve professional communication and leadership skills.
