

**Course Code:** ZOC 103  
**Number of Credits:** 3  
**Effective from AY:** 2020 -21

**Course Title: Animal Biochemistry**

<b>Prerequisite for the Course:</b>	Elementary knowledge on structural biochemistry of Protein, Carbohydrate and Fat.	
<b>Objectives:</b>	To understand the biochemical integrity of various metabolic pathways. To understand metabolic pathways, their regulation, and application in diagnostic and maintenance human well being state.	
<b>Content:</b>	<p><b>Module 1</b>  Water as biological solvent; Ionization of water and buffering in biological system.</p> <p>Enzyme Kinetics and enzyme inhibition;  Catalytic and Regulatory strategies of Enzymes.</p> <p>Concept of metabolism; Concept of free energy; Coupled reaction; TCA cycle; Electron transport system; Oxidative phosphorylation.</p> <p><b>Module 2</b>  Regulation of Glycolysis &amp; Gluconeogenesis, Glycogenolysis &amp; Glycogenesis.</p> <p>Integration of Fatty acid synthesis &amp; <math>\beta</math> Oxidation of fatty acid; Importance of Cholesterol and Lipoprotein in health management; Eicosanoids : types, outline of biosynthesis and their physiological importance.</p> <p>Metabolism of Purine and Pyrimidines.</p> <p><b>Module 3</b>  Protein and peptide chains; Primary-, Secondary-, Tertiary- and Quaternary structures of protein; Purification of proteins.</p> <p>Protein turn-over and amino acid catabolism; Nitrogen</p>	<p><b>3 hours</b></p> <p><b>5 hours</b></p> <p><b>4 hours</b></p> <p><b>4 hours</b></p> <p><b>6 hours</b></p> <p><b>2 hours</b></p> <p><b>4 hours</b></p> <p><b>4 hours</b></p>

	<p>excretory pathways; Oxidation of amino acids; Bio-synthesis of amino acids in animal.</p> <p>Integration of metabolism; Caloric homeostasis; Membrane receptors; Role of calcium and calmodulin in metabolism.</p>	<b>4 hours</b>
<b>Pedagogy:</b>	Lectures/ tutorials/ online teaching mode/self-study.	
<b>Learning Outcome:</b>	<ol style="list-style-type: none"> <li>1. Understanding the various metabolic pathways</li> <li>2. Understanding the regulation of various metabolic pathways.</li> <li>3. Understanding the integrative metabolism and life processes.</li> <li>4. Understanding the application of metabolism in maintenance of human well being state.</li> </ol>
