Course Code: ZO0 308 Course Title: Laboratory course on Life processes

**Number of Credits: 3** 

Effective from AY: 2020 -21

Prerequisite	Knowledge on Neuro-physiology and Stem cell biology.	
for the Course:		
<b>Objectives:</b>	Laboratory training based on skilled based courses on Physiology.	
Content	Module 1:	
	<ol> <li>Effect of thermal stress on the excretory rates in bivalves.</li> <li>Effect of salinity stress on the respiratory rates of bivalves.</li> <li>Effect of salinity acclimation in the osmo-regulatory processes of mud crab / tilapia fish.</li> <li>Rates of Na<sup>+</sup>, K<sup>+</sup> ion transport, K<sub>m</sub> V<sub>max</sub> of Na<sup>+</sup>-K<sup>+</sup> ATPase, rates of excretion and rates of respiration).</li> <li>Effect of salinity stress on the membrane fluidity of gill epithelial cells of mud crab / tilapia fish.</li> <li>Isolation of different parts of brain membrane by sucrose gradient centrifugation and characterization of those isolated membranes</li> <li>Estimation of neurotransmitters from fish brain regions (any two neurotransmitters using any two techniques).</li> <li>Module 2:</li> <li>Evaluation of learning and memory experiments using Freshwater Snail or Bivalves or crabs.</li> <li>Primary cultures of neurons from chick embryo brains.</li> <li>Isolation and Culture of Chicken Cartilage Stem/Progenitor Cells.</li> <li>Isolation and Differentiation of Mesenchymal Stem Cells from Broiler Chicken Compact Bones.</li> <li>Isolation and maintenance of chicken embryonic stem cell from blastodem.</li> <li>Isolation and culture of Dermis-Derived Mesenchymal Stem/Progenitor Cells from chick embryo.</li> <li>Module 3:</li> <li>Every student must go for the Internship programme for 1 month.</li> <li>DC will select the Institution / Industry with in Goa for the Internship programme at Pharma Industries, National as well state laboratories at Various Institute etc.</li> </ol>	12 x 2 hrs
