

Course Code: ZOO 326

Course Title: Fishery Biology

Number of Credits: 3

Effective from AY: 2020 -21

Prerequisite for the Course:	Basic knowledge on animal anatomy, physiology and endocrinology	
Objectives:	To understand the various aspects of fisheries. To understand the potentiality of fisheries in India, more particularly in Goa.	
Content	<p>Module1: Fish diversity: Fish Classification and diversity of freshwater and Marine fishes of India. Gas exchange and swimming: Air breathing organs and gas bladder; Swimming modes (fin versus body trunk), swimming muscles and tail beat. Fish Reproduction: Sexual maturity and breeding season of various cultivable species; Development of gametes in male and female; Endocrine control of fish reproduction. Fecundity, Fish egg and embryonic development, Reproductive cycles, reproductive behaviour, parental care and migration.</p> <p>Module 2: Different Types of culture practices: Monoculture, Monosex culture, Cage culture, Pen culture, and Integrated culture. Culture of Freshwater Indian major carps and ornamental (lacustrine) fish culture; Shell fish culture (prawns) practice and scope in India. Fish diseases, Immune response to pathogens. Management of fish farm/ ponds; Aquatic weeds and their control. Integrated health management of farm. Fish nutrition: Sources of food, feed compositions, Forms of feeds: wet feeds, moist feeds, dry feeds, mash, pelleted feeds, floating and sinking pellets, farm made feeds using local ingredients. Feed storage: Methods of storage and degradation. Use of preservatives and antioxidants in feed. Feed evaluation: Feed Conversion Ratio (FCR); Feed Efficiency Ratio (FER); Protein Efficiency Ratio (PER), Net Protein Utilization (NPU) and Biological Value (BV); Digestive enzymes, feed digestibility; Factors affecting digestibility.</p> <p>Module 3: Fishery technology and economics: Fishing gears and crafts used in Indian coasts. Fish Industry: Fish preservation, transportation, processing Industries in India. Fishery economics: Status of Indian and global scenario. Major</p>	<p>12 hr</p> <p>12 hr</p> <p>12 hrs</p>

	pelagic and demersal fisheries of Indian coasts and strategies for its development and conservation. Stock replenishment, Sea ranching and FADs. Fish supply chains and export.	
Pedagogy:	Lectures/ tutorials/assignments/self-study	
Learning Outcome:	1. Understanding the socio-economic development through Fisheries. 2. Acquiring the basic knowledge about the Fisheries as to set entrepreneurship.
