

possible. I observed the working of various instruments and learned new techniques. The microbiologists in the department were very patient and supportive. Even though they had their own share of work, they managed to help me with solving my doubts and lend me a hand of support throughout these 15 days.

I am extremely grateful to the Microbiology department of Geno Pharmaceuticals, The QC Head Ms. Trupti Walke, the HR team, and the Management of Geno Pharmaceuticals for giving me this learning opportunity.
